ABOUT ME

Full Stack Software Developer with hands-on experience building production-ready web applications using React, Node.js, Django REST, PostgreSQL, MongoDB, and AI integrations. Proven ability to design scalable systems, integrate third-party APIs, and translate real-world problems into robust digital solutions. Strong interest in AI-driven platforms, fintech, automation, and product-focused development. Comfortable working in fast-paced, remote-first environments.

WORK EXPERIENCE

Freelance Full-Stack Software Engineer

Febuary, 2024 – Present

Responsibilities & Contributions:

- Built and delivered full-stack web applications for clients across multiple sectors, translating business requirements into scalable technical solutions.
 - Collaborated with cross-functional teams and external stakeholders to contribute to ongoing web products and shared codebases.
 - Wrote clean, maintainable, and well-documented code by strictly following Product Requirement Documents (PRDs), system designs, and best engineering practices.
 - Designed and implemented RESTful APIs, backend services, and database schemas to support frontend and third-party integrations.
 - Performed unit testing and debugging to ensure product reliability, performance, and long-term maintainability.
 - Integrated AI-powered features into products where required, enhancing automation, decision-making, and user experience.
 - Ensured timely delivery of features while maintaining code quality and scalability standards.
-

EDUCATION

ALX Software Engineering

- Graduated: June, 2025

Bachelor of Education in Chemistry

- Graduated: July, 2023

PROJECTS

GUARD-AI — AI-POWERED TRADING DISCIPLINE PLATFORM

Full Stack Development

Tech Stack: React, Django REST Framework, PostgreSQL, Gemini AI.

- Built an AI-driven behavioral enforcement system to prevent emotional over-trading and poor risk management.
- Integrated Gemini AI to transform natural-language trading strategies into structured, mandatory execution protocols.
- Implemented real-time risk scoring and rule validation that blocks trade execution when discipline rules are violated.
- Connected live market data via CCXT (Crypto) and MetaTrader 5 (Forex) APIs.
- Designed an interactive dashboard providing real-time alerts, protocol status, and account discipline metrics.
- Deployed frontend on Vercel and backend on PythonAnywhere using PostgreSQL (Supabase).

WORKFEED — PORTFOLIO-FIRST FREELANCE PLATFORM

Full Stack Development

Tech Stack: React, Django, SQL, TailwindCss

- Designed and built a freelance platform that prioritizes proof of work over proposals, improving talent discovery.
- Implemented portfolio-based profiles and social-style project feeds for freelancers.
- Built authentication, user profiles, and client-freelancer interaction workflows.
- Focused on scalable API design and clean separation of frontend and backend logic.

NEXUS-VERIFY — VERIFICATION & VALIDATION PLATFORM

Full Stack Development

Tech Stack: React, Django Rest Framework, SQL, TailwindCss

- Developed a secure system for document, identity, and data verification.
- Built verification workflows and admin dashboards for tracking validation status.
- Implemented role-based access control and secure REST APIs.
- Focused on data integrity and auditability for sensitive verification processes.

SKILLS

Frontend:

React (Vite), JavaScript (ES6+), HTML5, CSS3, Responsive Design

Backend:

Node.js, Express.js, Python, Django, Django REST Framework (DRF)

Databases:

PostgreSQL (Supabase), MongoDB

AI & Integrations:

Google Gemini AI, REST APIs, JWT Authentication, Third-party API integrations

DevOps & Tools:

Git, GitHub, Vercel, Google Cloud Run, CI/CD basics

Other:

System Design Fundamentals, API Architecture, Debugging, Agile Collaboration
